

FIRM PROFILE

New Construction

Renovation

Planning

LB Architects LLC, was established in 1988 as Leber Brown Architects and became a Limited Liability Corporation in 2008. We have been historically located in northeast Ohio for the past 30 years and currently the firm's offices are at 1674 Stine Road in Peninsula, Ohio 44264. The offices consist of approximately 1200 square feet of floor space and have the latest technology to complete the project at hand. Our approach to architectural work has always been the development of a project team, client, architect and consultants, that provides the groundwork for a successful project. It has been our attitude that technology along with work experience combines to form the best possible professional solution. Our staff is built around two registered architects and one associate architect.

We treat all projects with the same level of importance and are committed to meet our client's goals and objectives. A quick response to our clients is a strong point. We pride ourselves in the knowledge that creative solutions can be delivered on time, on budget.
